

# Summer School 2019: Dealing with Uncertainty

## DATE

June 17, 10 a.m. - June 20, 4 p.m.

## ORGANISATION

Swiss Graduate School for Cognition, Learning, and Memory

## ACTIVITIES

Expert keynotes | PhD student presentations | practice peer review | workshops | networking opportunities | leisure time activities

## WORKLOAD

3 credits

## INFORMATION & REGISTRATION

National and international PhD students are welcome to register. Please visit our website for more information, registration requirements, registration fees, and different waiver and travel grant options.

## VENUE

Seminar-Hotel Rigi  
Seestrasse 55/57  
6353 Weggis, Switzerland

# Summer School 2019

## Dealing with Uncertainty: Decision Making and Memory Processes

A four-day seminar for PhD students from different disciplines, including psychology, clinical, cognitive, and brain sciences

### AIMS

In the planned summer school, we will bring together PhD students and internationally recognized researchers in the field of decision-making, memory processes, and metacognition. Special emphasis will be put on individuals experiencing and monitoring uncertainty across the lifespan, including healthy and clinical samples. There will be many opportunities for continued education for PhD students, and for networking in the scientific community.

### PROGRAMME

The programme will include keynote talks, PhD presentations, peer review sessions, workshops, as well as leisure time activities in the Swiss mountains.

### FEES

Participation costs are 820 CHF, all inclusive. Full members of the Swiss Graduate School for Cognition, Learning, and Memory are waived, excluding a 100 CHF registration fee. External PhD students can apply for a Summer School grant. See our website for more information.

### DEADLINE FOR REGISTRATION

Make sure to register before 31st of March, 2019!

### Emergence and development of uncertainty monitoring

Prof. Dr. Simona Ghetti,  
University of California, Davis, USA

### Metacognitive monitoring in older adults

Prof. Dr. Christopher Hertzog,  
Georgia Institute of Technology, Atlanta, USA

### Value, uncertainty, and the control of behaviour

Prof. Dr. Benedetto de Martino,  
University College London, UK

### Metacognition in clinical populations

Prof. Dr. Céline Souchay,  
Université Grenoble Alpes, France
